PROPERTY CLAIMS AND INSURANCE PROFESSIONALS

Expedite insurance claims and the rebuilding process with Diamond Point's 3D capture system

After a disaster strikes, homeowners and business owners want to get back on their feet as soon as possible. This means they want to process their claims quickly and get their lives back in order, especially when they need to rebuild.

With Diamond Point 3D capture system, property claims and insurance professionals can streamline the documentation and claims process. Their clients are equipped with the most state-of-the-art, precise form of documentation and at **an affordable price**.

Key benefits

- 1** Faster and fairer returns for your clients.
- 2** Reduce travel time and expenses by enabling remote team members to explore a space as if they were there.
- 3** Expedite claims process with a fully-immersive experience.

Insurance adjusters:

Send your company the 3D virtual tour as documentation of the homeowner's contents.

Contractors:

Use 2D schematic floor plans for square footage and measurements.

Explore the 3D virtual tour when you cannot physically return to the home.

Homeowners:

Be sure to completely document the content inside a home.

Use your Diamond Point scan over and over. You will be able to email the scan to multiple contractors for repair estimates.

I have the tools that can document every square inch of a home so the insurance company will have record of the content.

I also have the ability to generate a blueprint so the Contractor can get to work redesigning the home.
